Power lines were blown down by high thunderstorm wind.									

### May 12, 2000 - Event Narrative

A cold front moved into North Texas, and became stationary along a Bonham, Dallas, Hillsboro, Goldthwaite line. Numerous hail and wind reports were received. An F-3 tornado touched down near Lake Whitney in the late afternoon hours. The parent storm continued to develop on the south flank, resulting in a long lived wall cloud that moved south through southern Bosque, western McLennan, eastern Coryell, and western Bell counties. While reports of hail and funnels continued through the life of the storm, no additional tornadoes were sighted.

### May 26-27, 2000 - Event Narrative

Thunderstorms developed again along numerous boundaries in North Texas. The first area stretched from north of the Dallas/Fort Worth metroplex to the Red River. These storms occurred mainly on the 26th. Several tornadoes were reported in Young and Jack counties, while several other counties experienced hail and strong winds. On the 27th, the thunderstorms developed further south, in an area from Corsicana to Goldthwaite.
